Journal of Food Protection
Index to Volume 54

AUTHOR INDEX

ABOUZIED, M. M., (see Pestka, 288).
ACKER, R. F., (see Rua, 960).
ACUFF, G. R., effect of degree of sanitation, 200; pathogen survival and critical control points, 767; acid decontamination of beef carcasses, 868.
ADKINSON, R. W., premilking udder preparation, 957.
AKHTAR, M., (see Szabo, 272).
ALEXANDER, A. V., (see Walker, 178).
ALLEN, G., recovery of *Salmonella* from frozen shrimp, 22; recovery of *Salmonella* from food, 492.
ANATHESWARAN, R. C., (see Doores, 637).
ANDERSON, M. E., bacterial penetration into meat, 256; (see Dickson, 514).
ANDREWS, C. D., (see Kotula, 687).
ANDREWS, W. H., (see Allen, 22, 492).
APRO, N., (see Vaamonde, 542).
ARGANOSA, G. C., (see Reddy, 298).
ARMSTRONG, A., (see Warburton, 669).
AXER, M., determination of aflatoxin in foods, 291.
AXTELL, R. C., (see Jones, 259, 502).
AZCONA, J. I., (see Hernández, 366).
BABIUK, T., (see Warburton, 669).
BAER, R. J., alteration of milk fat, 383; accuracy of milk fat analysis, 890.
BAILEY, J. S., Salmonellae from broiler carcasses, 354.
BAKER, J., (see Bodyfelt, 969).
BALABAN, M. O., (see Wei, 189).
BALDWIN, R. E., (see Fields, 117).
BARNHART, H. M., *Salmonella* in layer hens, 488.
BARTLETT, P. C., bulk tank and filter cultures in screening, 848.
BASANTA, Y., (see Ocando, 856).
BASTIEN, R., (see Barnhart, 488).
BENEDICT, R. C., (see Smith, 166); production of hemolysin and catalase by *Listeria*, 528.
BENNETT, B., (see Rose, 127).
BENNOUR, M., (see El Marrakchi, 788).
BEREMAND, M. N., (see Pestka, 288).
BERGDOLL, M. S., production of enterotoxins, 650.
BERRY, E. D., (see Hutkins, 681).
BEUCHAT, L. R., comparing methods for yeast and mold counts, 443.
BISHOP, J. R., evaluation of 3M petrifilm AC, 308.
BISSONNETTE, G. K., recovery of heat stressed *E. coli*, 90.
BJORCK, L., (see Carlsson, 32).
BLACK, W. D., (see McEwen, 454).
BLANK, G., evaluation of sprouts and seeds, 560.
BLANKENSHIP, L. C., (see Bailey, 354).
BODYFELT, F. W., Bacillus in fluid milk, review, 969.
BOHNER, H. F., (see Marth, 338).
BOISON, J. O., (see MacNell, 37).
BOLESZCZUK, P., (see Entis, 930).
BORREGO, J. J., microbial accumulation by bivalve molluscs, 612; indicators and pathogens in shellfish, 711.
BOSIRAUD, C., virulence of *Listeria* on mice, 917.
BOUCHRITI, N., (see El Marrakchi, 788).
BOYD, G., (see Thayer, 718).
BRACKETT, R. E., (see Behchat, 443).
BRADSHAW, J. G., (see Twedt, 12).
BRAUN, H. E. (see Frank, 41).
BRIZZIO, S. B., (see Vaamonde, 542).
BROWN, R. L., production of aflatoxin in maize, 623.
BROWN, W. L., (see Fain, 756, 762).
BRUCE, V. R., (see Allen, 22, 492).
BRUNNER, K., (see Doyle, 334).
BUCHANAN, R. L., (see Palumbo, 429).
BULLERMAN, L. B., *Staphylococcus* in salad bar ingredients, 844.
BUNCÎC, S., (see Radisîc, 413).
BURDA, K., (see Collins, 381).
BUTLER, K. M., pentachlorophenol residues in pork, 448.
BYRNE, R. D., JR., (see Bishop, 308).
CABRERA SALAS, L. T., (see Ocando, 856).
CALDEIRA, R., (see Warburton, 669).
CARLSSON, A., Charm test II as confirmatory method, 32.
CARMICHAEL, L., (see Zee, 263).
CARNICIU, M., (see Genigeorgis, 662).
CAROSELLA, J. M., (see Fain, 756); lethality of heat to *E. coli*, 762.
CASH, J. N., (see Santerre, 225).
CASPER, D. P., (see Baer, 890).
CASTRO, D., (see Borrego, 612).
CHAIN, V. S., (see Fung, 208).
CHAN, S. W., (see Groody, 249).
CHAO, C. H., (see Harrison, 524).
CHARLEBOIS, R., surface contamination of beef, 950.
CHEATLE, T. F., (see Llewellyn, 627).
CHEN Y. H., (see Woodburn, 700).
CHEN, C., (see Harte, 643).
CHEN, J. S., (see Wei, 546).
CHUNG, K. T., (see Wei, 546).
CHUAQUI-OFFERMANNS, N., radiation dose yield of o-tyrosine, 935.
CLARKE, R. C., (see McNab, 619).
CLEVELAND, T. E., (see Brown, 623).
CLYDESDALE, F. M., Zn & Ca solubility from tea and coffee, 451.
COLLINS, M., adulteration of wine, 381.
COOPER, C., (see Axer, 291).
CORNAX, R., (see Borrego, 711).
CORRIER, D. E., (see Hinton, 496).
COTTY, P. J., (see Brown, 623).
COX, N. A., (see Bailey, 354).
CRAUN, G. F., (see Levine, 71).
CUNNINGHAM, C. P., (see Robison, 798).
CUPPETT, S. L., effect of antioxidants on *Pseudomonas* lipases, 133.
D'AOUST, J. -Y., latex agglutination kits for *Salmonella*, 725.
DE GUZMAN, A. M. S., (see Mayorga, 47).
DE PEDERIVA, N. B. B., (see Mayorga, 47).
DE ZUNIGA, A. G., (see Anderson, 256).
DECALLONNE, J., identification of lactic acid bacteria, 217.
DELACY, K. M., (see Hudson, 696).
DELFGOU-VAN ASCH, E. H. (see Notermans, 124).
DELMEE, M., (see Decallonne, 217).
DELOACH, J. R., (see Hinton, 496).
DENG, M. Y., virus detection in pork, 28.
DESROSIERS, T., (see Clydesdale, 451).
DICKSON, J. S., bacterial contamination of tissue surfaces, 102; control of *Salmonella* on beef tissue, 514.
DIMICK, P. S., stability of vitamin A in milks, 113.
DIOTTE, M. P., (see Sharpe, 277).
DIXON, Z. R., (see Acuff, 200).

SUBJECT INDEX

Acids
  control, *Salmonella* in beef, acetic acid, 514
  decontamination of beef carcasses, 868
  heat decomposition of alar in pH adjusted sugar solution model, 225
  inactivation of *Listeria*, sorbate, 593
  intracellular pH and survival of *Listeria*, 15
  microbial safety of mayonnaise, 913
  Salmonella & *Listeria* in mayonnaise, acetic acid, 691
  sanitation of dairy plant flowmeters, 966
  sensitivity of *Listeria* to nisin, 836
Aeromonas
  accumulation by bivalve molluscs, 612
  aerobic growth of *A. hydrophila*, curing agents, 429
  E. coli as indicators for pathogens in shellfish, 711
  in New Zealand retail foods, 696
  inhibition of food spoilage *Aeromonas*, 436
  starter culture against psychrotrophs, 873
Aflatoxins (also see Mycotoxins)
  comparing quantification methods, 291
  detection of precursors, 105
  production
    in soybeans, 542
    in corn, control by nontoxigenic *Aspergillus*, 623
  survey of peanut butter, 627
Alar (Daminozide)
  decomposition by heat, acids and canning process, 225
Alergy
  biogenic amines in fermented foods, review, 460
  histamine in cheese, 852
  microbial & chemical quality of mackerel, 788
Alcohol beverage
  adulteration of wine, 381
  amines in fermented foods, 460
  lead migration from crystal decannter, 378
Aldehydes
  processing parameters and storage of cream, 109
Ammonium inhibition of mycotoxigenic fungi in corn, 295
Antibiotics
  in milk
    Charm test II as confirmatory test, 32
    treatment practices, residue control methods, 454
  in meats, screening tests, 37
Antioxidants, effects on,
  Aspergillus spore germination, BHA, 375
  Pseudomonas lipases, BHA, BHT, TBHQ, 133
Bacillus
  evaluation of
    3M Petrifilm AC, 308
    sanitizers in dairy plant, 305
  in fluid milk products, review, 969
  production of toxin in rice, milk, 272
  radiation resistance of spores in honey, 894
  temperature abuse of ready to serve foods, 372
Bacteria
  acid decontamination of beef carcasses, 868
  aerobic growth of *Aeromonas hydrophila*, 429
  Bacillus in fluid milk products, review, 969
  bacteriocin inhibition of *C. botulinum*, 349
  Botulinum toxin production inhibition by *C. sporogenes* in meat, 50
  bulk tank milk quality, 549
  contamination of
    beef surface by cattle manure, 102
    chicken legs, electric stimulation, 508
  control of *Listeria* in frankfurters, 681
  evaluation of time-temperature indicators, 885
  inactivation of
    surface-adherent *Listeria*, 4
    microorganisms by polyphosphates, 360
  indicators for pathogens in shellfish, 711
  inhibition of food spoilage *Aeromonas*, 436
  microbial accumulation by bivalve molluscs, 612
  microbial quality of
    chicken nuggets, 841
    fresh meat in Tunisia, 773
    fryers, sensory quality, 700
    goat milk, 263
    Hispanic cheese, 598
    mackerel, chemical quality, 788
    meats with modified atmosphere, 58
    restructured steak, 357
    smoked herring, 557
    sprouts and seeds, 560
    tofu under cold storage, 212
    Venezuelan cheese, 856
  microbial safety of mayonnaise, 913
  motile Aeromonads in retail foods, 696
  on lamb carcasses, 945
  outbreaks of waterborne disease, 71
  penetration of microbes, pressure spraying, 256
  premilking udder preparation, 957
  production of hemolysin & catalase by *Listeria*, 528
  radiation resistance of spores in honey, 894
  sanitation in slaughter house, 200
  sanitizers
    in dairy processing plants, 305
    effectiveness against ropy bacteria, 632
  sensitivity of *Listeria* to nisin, 836
  starter cultures against psychotrophs, 873
  storage life of fresh pork loin cuts, 778
  surface contamination of beef carcasses, 950
  survival of *Borrelia burgdorferi* in milk, 532
  temperature abuse of ready to serve foods, 372
  thermal treatment of *Listeria*
    influenced by growth temperature, 166
    in milk, 12

in meat, 334
ultrafiltration and reverse osmosis, review, 801
virulence of *Listeria* on mice, 917
Bacteriological methods
bacteria on lamb carcasses, 945
carbohydrates on survival of *Streptococcus*, 537
comparison of methods for
aerobic counts, 208
Listeria, 669
in meat products, 23
in milk, 602
Salmonella
from broilers, 354
in milk, 421
in high moisture foods, 492
yeast & mold counts in foods, 443
ELISA test for *Listeria*, 752
enrichment methods for isolating *Listeria*, 7
enterotoxin production by
sac culture of *Staphylococcus*, 650
Yersinia, 47
evaluation of 3M Petrifilm AC, 308
identification of
Lactic acid bacteria, 217
Listeria, rapid, 370
Listeria by Micro-ID Listeria, 798
inhibitory substances in herd milk, 32
intracellular pH of *Listeria*, 15
isolation of
E. coli from
seawater & oyster, 246
foods with DNA hybridization, 249
Listeria from
milk powder, 124
seafoods and water, 170, 174
heat stressed *E. coli*, 90
Salmonella
from frozen shrimp, 22
method comparison, 725
method for detecting viruses, 28
Microtiter plate method for *Listeria*, 121
Penicillin G residues in injected calves, 37
rapid detection of
foodborne pathogens, 387
psychrotrophs in milk, 861
Salmonella, method comparison, 930
screening bulk tank and filter cultures, 848
thermal resistance indicator for *Listeria*, 519
Biomass production of bacteria and yeast, 117
Beef
acid decontamination of carcasses, 868
carcasses, microbial penetration, 256
comparing plate count techniques, 208
delayed growth of *Listeria* by lactate, 283
ELISA test for *Listeria*, 752
lethality of heat to
E. coli, 762
Listeria, 756
microbial quality, in Tunisia, 773
pathogen survival, critical control points, 767
spray chilling of beef
control of *Salmonella*, 514
hygienic assessment, 731
surface contamination of beef carcasses, 950
thermal treatment of *Listeria*, 334
Borrelia burgdorferi (also see Lyme disease), 532
Botulinum toxin (also see *C. botulinum*)
in irradiated pork, 94, 939
in pasta, 162
in unacidified products in oil, 648
inhibition by *C. sporogenes*, 50
vacuum-packaging of *Enoki* mushrooms, 20
Brochothrix thermosphacta
storage life of fresh pork loin cuts, 778
Cabbage
fate of *Listeria*, modified atmosphere, 302
Campylobacter jejuni
broiler production & processing, 259
microbial & sensory quality of fryers, 700
survival on
turkey roll with modified atmospheres, 194
Cellulomonas uda
biomass production on corn cob and stalk, 117
Cereal
aflatoxin inhibition, nontoxic *Aspergillus*, 623
aflatoxin quantification methods, 291
thermal resistance of *N. fischeri*, 582
Cheese
amines in fermented foods, 460
ELISA test for *Listeria*, 752
fate of *Listeria*, 418, 662
microbial quality of
Hispanic cheese, 598
Venezuelan cheese, 856
production of histamine, 852
recovery of *Salmonella*, 492
ultrafiltration, reverse osmosis, review, 801
Citrobacter freundii
false positive during isolation of *Salmonella*, 725
Clostridium botulinum
in irradiated pork, modified atmospheres, 588, 939
in syrup, 585
in unacidified products in oil, 648
inhibition by bacteriocin, 349
radiation resistance of spores in honey, 894
Coffee, Zn & Ca solubility, 451
Corn, inhibition of mycotoxigenic fungi, 295
Corynebacterium
evaluation of 3M Petrifilm AC, 308
post milking teat disinfection, 737
Cream, effect of UHT processing on aldehydes, 109
Crytosporidium
an emerging concern, 53
waterborne disease outbreaks, 71
Curing agents
effect of nitrite on growth of *Shigella*, 424
inhibition of *Aeromonas hydrophila*, 429
thermal inactivation of *Listeria* in pork, 408
Daminozide decomposition in pH adjusted sugar solution model, 225
DNA hybridization
detection of,
foodborne pathogens, 387
E. coli in foods, 249
Salmonellae
in meat and poultry products, 127
from broiler carcasses, 354
Egg
bactericidal effect of high pressure CO_2, 189
postmodern pathogen, *Salmonella*, 563
ELISA
detection of

aflatoxin and versicolorin, 105
aflatoxin, comparison of methods, 291
bovine milk in ovine milk, 366
deoxynivalenol, vomitoxin, 288
herbicide in raw milk, 136
Listeria
in meat and cheese, 752
in meat and environmental samples, 230
in seafoods, 170, 174
Salmonella from broiler, 354
Staphylococcal enterotoxin, 267
Enterobacteriaceae
microbial quality of Venezuelan cheese, 856
pressure spray of beef carcasses, 256
storage life of fresh pork loin cuts, 778
Enterotoxins
production by *Yersinia* in meat products, 47
production by *Staphylococcus*
in salad bar ingredients, 844
toxic shock syndrome, 267
with sac culture, 650
Enzyme
antioxidants on *Pseudomonas* lipases, 133
Bacillus in fluid milk products, review, 969
evaluation of time-temperature indicators, 885
phosphatase, quality of Hispanic cheese, 598
production of hymolysin and catalase, 528
protease kinetics, 578
Escherichia coli
accumulation by bivalve molluscs, 612
DNA hydridization, 249, 387
false positive during isolation of *Salmonella*, 725
hygienic assessment of beef chilling process, 731
in goat milk, 263
in seawater and oysters, 246
inactivation of *Listeria* on fingertips, 343
indicators for pathogens in shellfish, 711
inhibition by
isolates from cecal contents of chickens, 486
lethality of heat, in meat, 762
microbial quality of
fresh meats, in Tunisia, 773
sprouts and seeds, 560
Venezuelan cheese, 856
monitoring fecal coliforms in seafood, 554
pathogen survival and critical control points, 767
premilking udder preparation, 957
recovery from heat injury, 90
spray chilling of beef, hygienic assessment, 731
starter culture against psychrotrophs, 873
surface contamination of beef carcasses, 950
Fats
accuracy of milk fat analysis, 890
peroxide stability in shortening, 897
processing parameters and storage of cream, 109
quality, alteration of milk fat, 383
Flammulina velutipes, botulism and vacuum-packaging of, 20
Flavobacteria, affecting *Listeria*, 677
Flour, comparing plate count techniques, 208
Fruits and juices
adulteration of wine with apple juice, 381
assessment of juice package integrity, 643
bactericidal effect of high pressure CO_2, 189
direct application of hypochlorite, 960
pesticide in orange juice, 310
thermal resistance of *N. fischeri*, 582
Fungicides, in tomato products, 41
Giardia lamblia (also see protozoa)
waterborne disease outbreaks, 71
HACCP
critical control points, beef products, 767
postmortem meat inspection, 471
Heat
Bacillus in fluid milk products, review, 969
decomposition of Alar, 225
effect on irradiated *Salmonella*, 711, 718
inactivation of *Listeria*
on stainless steel surface, 4
with curing agents in pork, 408
with HTST process in raw milk, 12
inhibition of *Aeromonas hydrophila*, 429
lethality to
E. coli in meat, 762
Listeria in meat, 756
low temperature pasteurization of dairy fluids, 793
protection of *Salmonella*, microwave heating, 637
recovery of heat stressed
E. coli in relation to age of cells, 90
Listeria in relation to growth temperature, 166
spray drying of *Listeria* inoculated milk, 124
thermal resistance
indicators for *Listeria*, 519
propagules of *Neosartorya fischeri*, 582
UHT processing of cream, 109
Herbicides
detection in milk with enzyme immunoassay, 136
in blue crab meat, 298
Herbs, comparing plate count techniques, 208
Hypochlorite
direct application on foods, 960
inactivation of *Listeria*, 4
intracellular pH and survival of *Listeria*, 15
IAMFES/J. Food Protection
abstracts of papers, annual meeting, 811
announcement of developing scientists awards, 657, 750, 829, 905
annual meeting preliminary program, 313
annual meeting registration form, 154, 238, 322, 302, 479, 701
call for papers for annual meeting, 701, 785,
instructions for authors, 79, 152
letter to the editor, 476
membership application form, 84, 151, 158, 325, 330, 480, 569, 574, 745, 828, 902, 991
procedures booklet and 3A order form, 326, 404, 477, 570, 992
report of the editor, 1990-1991, 900
statement of ownership, 899
Insecticide, in tomato products, 41
Irradiation of botulinum toxin in pork, 94, 588, 939
Lactate, delay *Listeria* growth in meats, 283
Lactic Acid Bacteria
assessment of juice package integrity, 643
bacteriocin inhibition of *C. botulinum*, 349
effect on behavior of *Listeria*, 183
in sausages and frankfurters, 413
microbial quality of Venezuelan cheese, 856
production of histamine in cheese, 852
rapid identification, 217
sanitizers against ropy bacteria, 632
storage life of fresh pork loin cuts, 778
Lead migration into alcoholic beverages, 378

Listeria monocytogenes
affected by *Flavobacteria*, 677
attachment to cast iron, 925
contamination of beef surface, 102
control in frankfurters, bacteriocin, 681
critical control points, beef products, 767
decontamination of beef carcasses, lactic acid, 868
delayed growth by lactate in meat, 283
ELISA test, 752
fate in
cheeses, 662
fermented sausages and frankfurters, 413
Hispanic cheese, 598
reduced-calorie mayonnaise, 691
refrigerated and vacuum packed seafoods, 524
shredded cabbage, modified atmosphere, 302
Trappist cheese, 418
growth in skim milk, retentate and permeate, 338
heat injury and growth temperature, 166
identification method, 370, 798
inactivation by
heat in meat, 334
with curing agents, 408
heat in milk, 12
high pressure carbon dioxide, 189
hypochlorite and heat, 4
lactic acid bacteria, 183
polyphosphates, 360
sorbate, acids, 593
intracellular pH and survival of, 15
isolation from
frozen milk product plants, 178
meat and environmental samples, 230
milk powder, 124
seafoods, 7, 174, 922
shrimp, oyster and water, 170
raw milk, method comparison, 602
microbial quality of
chicken nuggets, modified atmospheres, 841
sprouts and seeds, 560
microbial safety of mayonnaise, 913
microtiter plate method for, 121
production of hemolysin and catalase, 528
rapid method, DNA based, 387
sensitivity and resistance to nisin, 836
survival in aerosols, 910
sources in dairy processing plant, 607
starter culture against psychrotrophs, 873
survival on hand, 343
thermal resistance indicators, 519
virulence of *Listeria* on mice, 917
Lyme disease, survival of *B. burgdorferi* in milk, 532
Mayonnaise
microbial safety of, 913
Salmonella and *Listeria*, 691
S. aureus in salad bar ingredients, 844
Meats
amines in fermented foods, 460
bacteria on lamb carcasses, 945
bactericidal effect of high pressure CO2, 189
comparing plate count techniques, 208
control of *Listeria* in frankfurters, 681
critical control points, beef products, 767
Cryptosporidium and food safety, 53
detection of
Listeria
and *Salmonella* on beef surface, 102
from meat processing plants, 230
in fermented sausages and frankfurters, 413
Penicillin G in calves, 3
Salmonella, 496
and *Listeria* on beef surface, 102
with DNA hybridization, 127
Yersinia enterotoxin, 47
inhibition of
Botulinum toxin
by *C. sporogenes*, 50
by irradiation and modified atmospheres, 94
lethality of heat to
E. coli, 762
Listeria, 756
microbial quality of
fresh meats in Tunisia, 773
restructured steak, 357
motile Aeromonads in retail foods, 696
postmortem meat inspection, 471
storage life of fresh pork loin cuts, 778
thermal treatment of *Listeria*, 334
Micrococcus, evaluation of 3M Petrifilm AC, 308
Milk
accuracy of milk fat analysis, 890
antibiotic residues, 454
Bacillus
in fluid milk products, review, 969
toxin production, 272
bulk tank milk quality, 549
comparing plate count techniques, 208
contact surface cleanliness, 879
contamination mycoflora of fermented milk, 131
evaluation of 3M Petrifilm AC, 308
growth potential of *Bacillus cereus*, 372
identification of bovine milk in ovine milk, 366
inhibitory substances detected by
enzyme immunoassay, 136
microbial assays, 32
isolation of *Salmonella*, 421
Listeria
affected by *Flavobacteria*, 677
detection from frozen milk product plants, 178
enumeration of, 124
growth, skim milk, retentate, permeate, 338
isolation, method comparison, 602
production of hemolysin & catalase, 528
thermal resistance of, 12
low temperature pasteurization of dairy fluids, 793
microbiological quality of goat milk, 263
postmilking teat disinfection, 737
premilking udder preparation, 957
quality, alternation of milk fat, 383
rapid detection of psychrotrophs, 861
sanitation of dairy plant flowmeters, 966
screening bulk tank and filter cultures, 848
survival of
B. burgdorferi, lyme disease, 532
Listeria in aerosols, 910
ultrafiltration and reverse osmosis, review, 801
vitamin A stability, 113
Zn & Ca solubility in tea and coffee, 451
Modified atmosphere
bactericidal effect of high pressure CO_2, 189
botulinum toxin production
affected by water activity in pasta, 162

in irradiated pork, 94, 588, 939

growth of *Listeria*
in frankfurters, vacuum packaging, 681
in shredded cabbage, 302
microbial quality of chicken nuggets, 841
microbiological aspects, a review, 58
storage life of fresh pork loin cuts, 778
survival of *Campylobacter* in turkey rolls, 194
Molds
aflatoxin production
in corn, control by nontoxigenic *Aspergillus*, 623
in soybeans, 542
comparing methods for mold counts, 443
contamination mycoflora of fermented milk, 131
inhibition of
A. flavus by polyphosphates, 360
Aspergillus spore germination by BHA, 375
mycotoxigenic fungi in corn, ammonium, sodium bicarbonate, 295
kojic acid production by *A. candidus*, 546
thermal resistant propagules of *N. fischeri*, 582
Mushroom, botulism and vacuum-packaging of, 20
Mycotoxins
aflatoxin
detection with ELISA method, 105
production control, nontoxigenic *Aspergillus*, 623
production in soybeans, 542
quantification methods comparison, 291
survey of peanut butter, 627
kojic acid production by *A. candidus*, 546
reactivity of DON antibody, 288
versicolorin
detection with ELISA method, 105
Nuts
aflatoxin survey of peanut butter, 627
comparing plate count techniques, 208
Oyster, isolation of *E. coli*, 246
Packaging, assessment of package integrity, 643
Parasite, Toxoplasma cysts in pork, 687
Pasta
botulinum toxin production under modified atmosphere packaging, 162
Peanuts, aflatoxin quantification methods, 291
Pediococcus
bacteriocin inhibition of *C. botulinum*, 349
control of *Listeria* in frankfurters, 681
starter culture against psychrotrophs, 873
Peroxide stability in shortening, 897
Pesticide
in blue crab meat, 298
in orange juice, 310
Plasmid, thermal resistance of *Listeria*, 519
Pork
comparing plate count techniques, 208
ELISA test for *Listeria*, 752
freezing effect on *Toxoplasma gondii*, 687
methods for detecting viruses, 28
modified atmosphere packaging and irradiation on botulinum toxin, 94, 588, 939
pentachlorophenol residues, 448
storage life of fresh loin cuts, 788
thermal inactivation of *Listeria*, 408
Poultry
bacterial contamination of chicken legs, 508
bactericidal effect of high pressure CO_2, 189
Campylobacter in broiler processing, 259
comparing plate count techniques, 208
detection of *Salmonella*
DNA hybridization, 127
in broiler production, 354, 502
in ovaries of layer hens, 488
direct application of hypochlorite on foods, 960
effect of heat & irradiation on *Salmonella*, 711
hydrophobic grid membrane filter, 619
inhibition of *Salmonella* and *E. coli*, 496
microbial quality
chicken nuggets, modified atmospheres, 841
fresh meats in Tunisia, 773
sensory quality of fryers, 700
modified atmosphere packaging
microbial quality, a review, 58
survival of *Campylobacter jejuni*, 194
postmodern pathogen, *Salmonella*, 563
radiation dose yield of o-tyrosine, 935
Processing plants
acid decontamination of beef carcasses, 868
antibiotic residues in milk, 454
attachment of *Listeria* to cast iron, 925
Campylobacter in broiler processing, 259
dairy processing, surface cleanliness, 879
evaluation of santizers in dairy plants, 305
hydrophobic grid membrane filter, poultry, 619
hygienic assessment of beef chilling process, 731
Listeria
in frozen milk production, 178
in meat products, 230
microbial flora in slaughter house, 200
monitoring fecal coliforms in seafood, 554
postmilking teat disinfection, 737
postmortem meat inspection, 471
premilking udder preparation, 957
Salmonella in broiler production, 502
sanitation of dairy plant flowmeters, 966
slaughter house beddings, pentachlorophenol, 443
sources of *Listeria* and *Yersinia*, dairy plants, 607
surface contamination of beef carcasses, 950
survival of *Listeria* in aerosols, 910
Protozoa
Cryptosporidium, a growing concern, 53
waterborne disease outbreaks, 71
Pseudomonas
evaluation of sanitizers in dairy plants, 305
low temperature pasteurization of milk fluids, 793
microbial quality
& sensory quality of fryers, 700
in chicken nuggets, modified atmospheres, 841
waterborne disease outbreaks, 71
Radiation
Botulinum toxin in pork with modified atmosphere, 94, 588, 939
effect on *Salmonella*, heat, chicken, 711, 718
o-tyrosine in irradiated chicken, 935
resistance of *Clostridium* & *Bacillus*, honey, 894
Rice
production of heat stable *Bacillus* toxin, 272
Salmonella
acid decontamination of beef carcasses, 868
bactericidal effect of
high pressure carbon dioxide, 189
contamination on
beef surfaces, 102

chicken legs, electric stimulation, 508
Hispanic cheese, 598
control by spray chilling of beef carcasses, 514
critical control points, beef products, 767
detection
DNA hybridization, 127, 387
method comparison, 354, 930
direct application of hypochlorite on foods, 960
effect of heat and radiation, chicken, 718
in high moisture foods, 492
in ovaries of layer hens, 488
in reduced-calorie mayonnaise, 691
indicators for pathogens in shellfish, 711
inhibition by isolates from cecal content of chickens, 496
isolation from milk, 421
latex agglutination kit for detection, 725
low temperature pasteurization of milk fluids, 793
microbial quality of sprouts and seeds, 560
microbial safety of mayonnaise, 913
microwave heating, 637
postmodern pathogen, 563
recovery from frozen shrimp, 22
starter culture against psychrotrophs, 873
Salts
aerobic growth of *Aeromonas hydrophila*, 429
effect of nitrite on *Shigella*, 424
fate of *Listeria* in Trappist cheese, 418
inhibition of *Aeromonas* in fish with potassium sorbate, 436
protection of *Salmonella*, microwave heating, 637
reducing sodium in foods, review, 138
Salmonella & *Listeria* in Hispanic cheese, 598
sensitivity of *Listeria* to nisin, 836
sorbate inhibition of *Aeromonas*, 436
thermal inactivation of *Listeria*, 408
Sanitation
attachment of *Listeria* to cast iron, 925
Bacillus in fluid milk products, review, 969
contact surface cleanliness, dairy plant, 879
contamination of beef, cattle manure, 102
control *Salmonella* by spray chilling, 514
direct application of hypochlorite on foods, 960
effect of drop volume on contact angle, 232
hydrophobic grid membrane filter, poultry abattoir, 619
inactivation of *Listeria*
by hypochlorite on stainless steel surface, 4
on fingertips by disinfectents, 343
inactivation of microorganisms by polyphosphate, 360
microbial and sensory quality affected
by santitation of slaughter house, 200
of dairy plant flowmeters, 966
postmilking teat disinfection, 737
waterborne disease outbreaks, 71
Sanitizers
direct application of hypochlorite on foods, 960
effectiveness against ropy bacteria, 632
evaluation in dairy processing plant, 305
inactivation of *Listeria*
by hypochlorite, 4
on fingertips, 343
intracellular pH and survival of *Listeria*, 15
postmilking teat disinfection, iodine, 737
sanitation of dairy plant flowmeters, 966
Seafood
bactericidal effect of high pressure CO_2, 189
direct application of hypochlorite on foods, 960
fate of *Listeria*, refrigeration, vacuum packaging, 528
indicators for pathogens in shellfish, 711
inhibition of *Aeromonas* in fish, 429
isolating
E. coli from oysters and seawater, 246
Listeria
from ready to eat fish products, 922
with standard methods, 7
with ELISA, 170, 174
Salmonella from frozen shrimp, 22
microbial accumulation by bivalve molluscs, 612
microbial quality
and chemical quality of mackerel, 788
of modified atmosphere packaging, review, 58
of smoked herring, 557
monitoring fecal coliforms in seafood, 554
motile Aeromonads in retail foods, 696
pesticide, herbicide, in blue crab meat, 298
protease of *Vibrio* from fish, 578
S. aureus and enterotoxin in clam chowder, 844
Shigella
DNA based rapid method, 387
effect of nitrite, 424
waterborne disease outbreaks, 71
Sodium bicarbonate
inhibition of mycotoxigenic molds, 295
Sorbates inhibition of
Listeria, 593
Aeromonas, 436
Staphylococcus
critical control points, beef products, 767
enterotoxin
production by sac culture, 650
production in clam chowder, 844
toxic shock syndrome, goat mastitis, 267
evaluation of sanitizers in dairy plant, 305
in salad bar ingredients, 844
indicators for pathogens in shellfish, 711
inhibition by polyphosphates, 360
low temperature pasteurization of milk fluids, 793
microbial accumulation by bivalve molluscs, 612
microbial quality of
smoked herring, 557
spouts and seeds, 560
Venezuelan cheese, 856
postmilking teat disinfection, 737
screening bulk tank and filter cultures, 848
Streptococcus
bulk tank milk quality, 549
effect of carbohydrates on culture preservation, 537
evaluation of 3M Petrifilm AC, 308
indicators for pathogens in shellfish, 711
microbial accumulation by bivalve molluscs, 612
microbial quality of Venezuelan cheese, 856
postmilking teat disinfection, 737
screening bulk tank and filter cultures, 848
Syrup, *C. botulinum* spores, 585
Tea, Zn & Ca solubility, 451
Tofu, microbial quality under cold storage, 212
Tomatoes and processed products detection of insecticides and fungicides, 41
Toxic shock syndrome enterotoxin & induced goat mastitis, 267
Vacuum-packaging of *Enoki* mushrooms, 20
Vegetables
C. botulinum in unacidified products in oil, 648
detection of
insecticides and fungicides, tomato products, 41

Salmonella in lettuce, 492
direct application of hypochlorite on foods, 960
evaluation of sprouts and seeds, 560
fate of *Listeria* in cabbage, 302
motile Aeromonads in retail foods, 696
S. aureus in salad bar ingredients, 844
Versicolorin
detection with ELISA method, 105
Vibrio
DNA based rapid method, 387
indicators for pathogens in shellfish, 711
microbial accumulation by bivalve molluscs, 612
protease kinetics, 578
Viruses
DNA based rapid method, 387
detection in pork, 28
indicators for pathogens in shellfish, 711
microbial accumulation by bivalve molluscs, 612
waterborne disease outbreaks, 71
Vitamins
photooxidation of Vitamin A in milk, 113
Water
incidence of *Listeria* contamination, 170
outbreaks of waterborne disease, 71
Water activity
new tester for high water activity, 277
Wood preservatives
pentachlorophenol residues in pork, 448
Yeasts
biomass production on corn cob and stalk, 117
comparing methods for yeast counts, 443
contamination mycoflora of fermented milk, 131
Yersinia enterocolitica
DNA based rapid method, 387
enterotoxin production in meat products, 47
sources in dairy processing plants, 607
starter culture against psychrotrophs, 873
